

## ACME-KSS3/3

### *Para-Aramid with 316 stainless steel wire sewing thread*

#### Description:

KSS3/3 Para-Aramid(Kevlar by Dupont) is made with 100% Polytetrafluoroethylene (PTFE), making it extremely lubricant and durable which allows it to for better hook pickup, lower elongation and strength for few knots and breaks. It also provides a 316 stainless steel sewing thread offer the strong tensile strength while the 316 with high Inconel stainless steel wire provides excellent chemical resistance.

#### Advantages:

- Heat resistant
- Chemical resistant
- Good sewability
- Flexibility
- Good tensile strength

#### Applications:

- Welding blanket/curtains
- Expansion joints
- High temperature insulation
- Heat shield/containment
- Gaskets & over-door seals
- Removable insulation cover
- Filter bag

## Property Data KSS3/3

|                                 |                                           |
|---------------------------------|-------------------------------------------|
| Material                        | Para-Aramid with 316 stainless steel wire |
| Twist                           | 3 ply with 3 wire                         |
| Tensile strength(lbs)           | Approx. 27                                |
| Final Twist                     | "Z"                                       |
| Para-Aramid Decomposition Point | Approx. 878°F (470°C)                     |
| Stainless Steel Melting Point   | Approx. 2552°F (1400°C)                   |
| Size of the thread              | 0.011"                                    |
| Weight per spool                | About 1.1 lbs(500 grams)                  |
