

304 Stainless Steel Mesh Cloth 304SS30 / 304SS42

Description:

Stainless steel knitted wire mesh is an easy to work with, yet durable mesh cloth made from numerous stainless-steel wires woven together. The 304 stainless-steel results in a mesh that is extremely sturdy and flexible. Its robust properties combined with its ability to bend and assume different angles makes it ideal in many insulation applications. It possesses good resistance to high temperatures and corrosive compounds.

Advantages:

- Heat/fire resistant
- Chemical resistant
- Moisture & corrosion resistant
- Abrasion/tearing/puncture resistant
- Flexible
- Increase sturdiness

Applications:

- Removable insulation covers
- Removable insulation blankets
- Marine industry
- Architectural applications
- Industrial/commercial pad construction

Property Data 304SS

Base cloth content/weave	304ss wire knitted loop mesh
Temperature resistance	Continuous use: 900°F (482°C) Intermittent use: 1200°F (648°C)
ITEM: 304SS30	Wire OD: 0.011", Width: 30", 2 ply, 6.5sf/lb 2ply flat, 50 lbs per roll
ITEM : 304SS42	Wire OD: 0.011", Width: 42", 2 ply, 6.5sf/lb 2ply flat, 50 lbs per roll
