

16oz Acrylic Coated Fiberglass Cloth NFG1600

Description:

NFG1600 Cloth is a fiberglass base fabric which has been coated on both side with our specially formulated acrylic rubber compound. The coating provides several benefits, including increased durability against abrasions/punctures/tears, and improved resistances against water, chemicals, and UV radiation as compared to regular fiberglass cloth.

Advantages:

- High heat resistant
- Durable
- Water resistant
- Chemical resistant
- Resistant to repeated use

Applications:

- Welding blankets/curtains
- Spark containment
- Fire blankets
- High temperature insulation
- Heat shields/containment

Different colors available upon request

Property Data NFG1660

Base cloth content/weave	100% E-Fiberglass Yarn/Plain
Fabric finish/Color	Acrylic compound coating/Salmon
Weight	16oz/yd ²
Thickness	0.017"
Temperature resistance	Base cloth: 1000°F (540°C) Coating: 225°F (107°C)
Size	40", 60" * 50 yards
